EDUCATN 770: Digitally Fluent Lesson Plan Proposal

This proposal document will help us to understand your thinking as you plan your digitally fluent lesson, as well as encouraging you to estimate how much time you will need to complete it. Part 1 should be no longer than a page. Submit the document to the Digitally Fluent Lesson Plan Proposal Dropbox.

Part 1:

(Your) Name:	
Topic:	[*State the topic of your lesson plan*]
Media using:	[*Indicate what media you plan to create and work with for the project*]
Preliminary concept:	[*Briefly describe your idea for the lesson plan*]
Course integration:	[*List the course concepts/skills/activities that you plan to integrate into your project; remember to draw from at least three weeks from the course. We understand it may be difficult to predict this ahead of the week the topics will be covered but do your best – or ask us!*]

Part 2:

In part 2, you will identify what tasks are involved in the creation of your lesson plan and estimate how much time it will take to complete them. Remember, you are not committing to a particular approach - Part 2 is simply meant as a guide for you to anticipate what will be required (note: a common tendency is to underestimate how long it takes to do most tasks, so plan accordingly).

Enter an 'X' in any column next to a task your project will entail, and then predict how long it will take you to do (in hours). Some 'X' columns are filled in for you because they are necessary and required.

[X]	Task	Est. time (in hrs)
X	Generate ideas	
X	Conduct research	
	Storyboard or map out lesson	
	Write script (video/podcast)	
	Find images/graphics (don't forget to attribute!)	
	Create graphics	
	Record & edit audio	
	Record & edit video	
	Write copy (text) for lesson	

	Design website	
	Write code	
X	Identify and remedy any accessibility barriers (e.g. captioning)	
X	Review lesson plan content for errors
